The Cypress documentation describes how to use the wait() function to wait for something to happen, and it also describes how to wait for a promise to resolve. However, when I try to wait for a promise, Cypress reports an error. The offending code: `async function submit(){ const loginForm = await wait('#login-form'); ... }` The error: `CypressError: Timed out waiting for element...` What I've tried: I've tried `wait(...).promise()`, but then Cypress reports an error about promise. Then I tried `wait(...).el.find()`, but the submit function is called before the element even appears on the page. How can I wait for a promise to resolve, so that Cypress can evaluate it? A: Like @ko1 said above, there are different functions for wait() in Cypress. The wait() function

What's New in the ComicReader?

ComicReader is an application that allows you to work with comic books by loading, saving and displaying them. The program supports the CBZ and CBR file formats for comic books, but also supports other formats if you want to try. The standard interfaces allow you to browse your comic book collection with the "Read" menu, browse the book with the "Open" menu or view the book opened with the "Contents" menu. You can also browse the comic book with the "Page Up" and "Page Down" keys, move up or down the book with the shortcut "P" and "N". You can jump to the first or last page of the comic book with one click of the "Jump" and "Go" keys. ComicReader is also a graphic viewer, equipped to open JPG, BMP, PNG and TIFF graphic files.
