Each time you start Windows the display of date and time is adjusted to the correct time zone. On the other hand, MyHorizon does not adjust the system time zone. MyHorizon makes this possible by hiding the date and time from display, as well as, refreshing the right time zone from a predefined list (you can also use manual or automatic adjustments). When there is no internet connection, the time and date can still be displayed manually or automatically by you. If you do not want to update the time zone from an internet source, you can just specify the correct time zone manually. MyHorizon Description: MyHorizon is

What's New in the?

Xkon is a simple and lightweight skin for Rainmeter that enables users to keep an eye on the functioning parameters of their system. The extension includes two themes: "Cloud" and "Pixel". Both of them display real-time usage statistics for RAM, CPU, network traffic and hard disk free space. You can configure Xkon to notify you every time a battery gets below 10%, or that a notification sounds when RAM is over 50% or usage goes above 10%. Xkon also allows you to configure short cuts that you can use to quickly access frequently used applications and websites. Xkon FAQ: How does Xkon work? Xkon is a Rainmeter plugin that makes use of the "wmctrl" command in Windows. This command enables you to directly configure some services like change the workspace, open the taskbar and start applications.

Xkon is very simple as you can directly configure the plugin within Rainmeter's UI. There's no need for you to go into the command line to change Rainmeter's settings. The installer also includes a "Configuration" screen where you can easily customize your preferences. How does Xkon compare to (other) power monitors? Xkon is very simple as you can directly configure the plugin within Rainmeter's UI. Other Power Watchers like PowerTicker offer similar functionalities as Xkon for the price of a premium. How easy is it to use Xkon? Xkon is very simple as you can directly configure the plugin within Rainmeter's UI. The plugin will automatically find out what applications and websites are opened on your computer, but you can also choose which ones you want to notify. Additionally, you can define which notifications sounds to play in Rainmeter. Is Xkon compatible with Rainmeter? Yes. You can download Xkon from the official Rainmeter website. What systems does Xkon support? Xkon is for Rainmeter Pro users. Where can I get Xkon? Xkon is currently not

in Rainmeter's package repository, because it was written using the API from Rainmeter Pro. So for now, the plugin can only be installed manually. You can download Xkon from the official Rainmeter site (Will Xkon work with my Rainmeter version? Xkon is for Rainmeter Pro users
