MIB Standards The MDD-MIB standard (Model Description, Design, Development) is an XML-based standard to describe MDD models. Model-driven engineering (MDD) is a software development paradigm and a tool that supports it. It allows the iterative construction of the model, and that model is later transferred to the development environment. MDD models have not been implemented in AutoCAD. History AutoCAD first appeared on the market in 1988. Initially, it was called "AutoCADview" and was just a hosted 3D environment. When it later evolved into AutoCAD, it became a desktop AutoCAD model. AutoCAD was initially developed by a team led by the Autodesk Corporation, which later became Autodesk. Features AutoCAD is a CAD program that provides an integrated set of tools for both architectural and civil engineering. It supports the export of DWG, DGN and DXF files. AutoCAD has the following features: Collaboration AutoCAD can be used in team work with collaboration. The user can share the model with the team or other users. AutoCAD supports file-sharing in a group model (a single model is divided into different files). Availability AutoCAD is available in the following formats: AutoCAD 16, AutoCAD LT, AutoCAD 2009, AutoCAD 2010, AutoCAD 2011, AutoCAD 2012, AutoCAD 2013, AutoCAD 2014, AutoCAD 2015, AutoCAD 2016, AutoCAD 2017, AutoCAD LT 2017, AutoCAD 2018, AutoCAD LT 2019, AutoCAD LT 2020, AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, AutoCAD Mechanical, AutoCAD Electrical Services, AutoCAD Pipe Tracing, AutoCAD Structural, AutoCAD Architectural Design, AutoCAD Architectural Design LT, AutoCAD Architectural Design LT 2020, AutoCAD Mechanical, AutoCAD Electrical Services, AutoCAD Piping Design. Software architecture AutoCAD runs on a PC. It does not have a standalone database, but rather a design database in the memory of the computer that is used by the a1d647c40b
