Gsm\4 Players\compressed\Gladius Relics of War_fce_4.rar that i'm getting from the list is supposed to work, but it's not working for me. I tried to rename it to Gladius Relics of War_fce_4.rar with the same result. And it's the first time i'm using this kind of keygen! I double checked that the file name was correct and it is. Also it is the only file i have on this folder named Gladius Relics of War. The other files in the zip file are inside a folder named Gsm and the other is inside Gsm\4 Players. If it wasn't clear, that means that in total there will be 4 files inside the zip file, 2 of them inside the folder Gsm and 2 inside the folder Gsm\4 Players. I am really out of ideas why this isn't working. I've been waiting for more than 15 hours and it's frustrating. This is the first keygen i've used and it's the first time i'm using a keygen on a pack of 2 players. Does anyone have an idea why this isn't working for me? PS. I am just getting started in this modding stuff and i don't know what to expect from it. I am asking for an hour, not 5 hours and nothing to lose if this is the case. Thank you!
