So when the Springboks beat the Wallabies by a close final margin of 16-15, the massive Nelson Mandela stadium erupted with cheers. The referee's whistle was blown and the players rushed toward the field to shake hands with Mandela. The victorious Springboks had won the World Cup. They had done so sporting know-how, smarts, and leadership skills. But it was the skills they had learned to practice in places like Soweto that kept them grounded; the values they had learned during their five years of incarceration that gave them the courage to aspire. Now they had played in a game and won a cup with opponents that were not only physical giants but who had come to expect not to lose. Mandela, however, had lost more than the World Cup. His health had been worsening. His most recent release from prison, on February 11, 2013, was only his second since he had been elected president in 1994. He had always been the most famous leader in South Africa and now that he was again imprisoned, his popularity was under assault. He had been given a new, less-demanding post-presidential job as governor of his home province of KwaZulu-Natal. He was also head of a board which was trying to tackle corruption in the province and would be responsible for a new five-year budget for the KZN. We did that with Mandela. He made people follow him and believe in him, when he really wanted them to follow their own beliefs. He was one of those people who, if you wanted to know something about a country like South Africa, you had to read a book by Nelson Mandela. You couldn't dip into

a newspaper, you had to dip into a book. That's what he told people. And people wanted to know. They wanted to get to know him, whatever that meant. He never tried to sugarcoat things. He was always honest. You didn't have to hide things from him, not when you were in his presence.

Like his father, Nelson was brought up as a traditional Xhosa. Unlike his father, Nelson did not take up a trade. Instead, he went to the University of Fort Hare and studied law. This section of the book describes his early experiences as an attorney. He states, No one encouraged me to pursue my own path in life. I should recall how I often heard the comment that nothing could come of a man who wanted to be a lawyer. 11 They were building the ANC into an armed movement. Their targets were government offices and soldiers. Mandela did not like that strategy. He was more concerned about the organization of the ANC than the fate of members who were caught. The ANC was built on a tribal basis. The struggle must not be against just a white oppressor. The ANC must be against white domination in South Africa as a whole. He would fight back, and he would fight back with freedom fighters. Mandela grew into the head of the ANC. He became the party leader when de Klerk was leader of the opposition. Mandela was elected president of South

Africa in 1994. He is a man of peace, and yet he is a man of an uprising. As more and more whites left the country and black people gained equality, the ANC began to think about power. Mandela was the president of the ANC. He became a man of reconciliation. He said that the ANC had to admit that they had caused many of the problems in South Africa and South Africa had to learn to live together. Cliff Young, one of his fellow prisoners, was with him at the time. Long remembered the scene; it will never leave him. I was thinking to myself, oh no! I don't like this, and I looked at Mandela and he was sitting quite still, and he looked at me, and we both felt this enormous emotional surge go through us. It was him and me. And we both said at the same time, 'I am free', only I said it first. 5ec8ef588b
